

Fronius WIFI Reconnection – GEN24

1. Touch the sensor at the front of the inverter once briefly to activate the WLAN access point. The right LED flashes blue when the access point is open.
2. Connect your tablet / smartphone to the WLAN network “fronius_3xxxxxxx” that is now available. The network security key “12345678” applies.
3. Enter the following IP address in the address line of your browser (e.g. Google Chrome): "192.168.250.181".
4. On the user interface of the inverter, go to “Communication” - “Network”.
5. Select the connection mode “WIFI”. Select your home network under “Available Networks” and enter your home network’s WIFI password.
6. Click "Connect" to apply the settings.
7. If you run into trouble, please copy the link below and watch the video:
